Alejo Ezequiel Suarez

FULL STACK & CLOUD DEVELOPER | INFORMATION SYSTEMS ENGINEERING STUDENT

(011) 2303-3147 | alejo.2001.suarez@gmail.com | Buenos Aires, Argentina | Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Full Stack & Cloud Developer with experience in web and mobile applications, Google Cloud and applied AI, certified as a Google Cloud Associate Cloud Engineer and studying Information Systems Engineering. I build generative AI products, RAG systems and agents, as well as academic, administrative and business systems used by thousands of people.

WORK EXPERIENCE

CLOUD DEVELOPER | Hike · ABN Group **May 2026 – Present**

- Development of multi-tenant generative AI products that integrate Gemini models through Vertex AI.
- Construction of content generation engines with automated output validation through deterministic checks and a judge model.
- Development of serverless services on Cloud Run integrated with third-party APIs, such as AFIP e-invoicing and the Meta Marketing API.
- Deployments on Compute Engine behind load balancers, infrastructure as code with Terraform and Google Cloud migration proofs of concept.

CO-FOUNDER & FULL STACK DEVELOPER | ADINI **Mar 2024 – Present**

- Co-founder of a software development agency: design and development of custom web and mobile applications, from requirements gathering to deployment.
- Built an AI agent for UTN FRBA with RAG (hybrid search on Qdrant, reranking and streaming) and a tool-calling supervisor over the virtual campus.
- Development of management systems and mobile apps for clients in Argentina and Mexico, with payment gateways and subscriptions.
- Kubernetes deployments with Helm, requirements gathering and backlog refinement with Scrum.

SOFTWARE DEVELOPER | National Technological University **May 2024 – May 2026**

- Developed the frontend of the SIA institutional portal and its aliases, areas, translations and mass mailing modules, with queues, retries and per-delivery tracking.
- Built the SICYT research system end to end: domain model, year-versioned rules engine and queued notifications.
- Contributed to the platform's shared services: Keycloak authentication, LDAP and the Traefik proxy.

FUNCTIONAL ANALYST | National Technological University **Nov 2023 – May 2024**

- Gathered, documented and tested requirements and features to ensure proper system operation.
- Designed class, use case, entity-relationship and deployment diagrams, and identified improvements in existing systems.

APPLICATION SUPPORT ANALYST | National Technological University **Aug 2022 – Nov 2023**

- Analyzed and resolved issues reported by users, from the admin interface or the database.
- Wrote SQL queries for administrative reporting and documented technical procedures.

EDUCATION

Information Systems Engineering, UTN FRBA Buenos Aires, **2021 – Present**

Bachelor's Degree in Economics, University of Buenos Aires Buenos Aires, **2019 – 2021**

CERTIFICATIONS

Google Cloud Certified – Associate Cloud Engineer, Google Cloud — **Aug 2026**

Google Cloud Certified – Professional Cloud Developer, Google Cloud — **In progress**

Artificial Intelligence Diploma, National Technological University — **Jul 2025 – Dec 2025**

Backend Developer Diploma, National Technological University — **Mar 2025 – Sep 2025**

Docker and Kubernetes, National Technological University — **May 2025 – Jul 2025**

Python Diploma, National Technological University — **Jul 2023 – Feb 2024**

Database Diploma, National Technological University — **Oct 2023 – Feb 2024**

University Expert in Information Security, National Technological University — **Mar 2023 – Sep 2023**

Full Stack Web Development Diploma, National Technological University — **Nov 2022 – May 2023**

B2 English Certificate, Cambridge Institute — **Jan 2009 – Dec 2017**

TECHNOLOGY STACK

Frontend: HTML, CSS, JavaScript, TypeScript, React, Next.js, Astro, React Native, Expo, Tailwind CSS, shadcn/ui, Material UI, TanStack Query.

Backend and Integrations: Node.js, Express, Python, FastAPI, REST APIs, OpenAPI, Prisma, Sequelize, Zod, OAuth 2.0, Keycloak, BullMQ, Apps Script, payments (Stripe, Mercado Pago, PayPal, RevenueCat).

AI and Agents: Vertex AI, Gemini, Ollama, vLLM, LlamaIndex, Qdrant, Docling, RAG, tool calling, MCP, Claude Code, Codex.

Google Cloud: Cloud Run, Compute Engine, Cloud Build, Cloud Storage, BigQuery, Secret Manager, Cloud KMS, IAM, Firebase.

DevOps and IaC: Docker, Kubernetes, Helm, Terraform, GitHub Actions, GitLab CI/CD, Jenkins, Traefik, Cloudflare, Grafana.

Databases: PostgreSQL, MySQL, MongoDB, Redis, Supabase.

PROJECTS

AI Agent "UtenIA" | UTN FRBA · ADINI — **Aug 2025 – Present**

Agent that answers with the university's documentation and each student's virtual campus data, with on-premise inference. I built the RAG pipeline (Docling, hybrid search on Qdrant and reranking), the tool-calling supervisor, the Moodle tools and the streaming chat.

"Integrated Application System" Portal | National Technological University — **Jan 2024 – Dec 2025**

The university's single portal with institutional login, digital ID and payslips. I developed the frontend and the aliases, areas, translations and mass mailing modules, with over 3,000 mailings sent.

"SICYT" Research System | National Technological University — **Aug 2025 – May 2026**

Research projects and categorization of over 500 researchers. I built the domain model, a year-versioned rules engine, the categorization workflow and queued notifications.

"Moviltrack" Management System | ADINI — **Apr 2024 – Oct 2025**

Quotes, orders, delivery notes and payments in a single flow for a Mexican company, with PDF documents, automatic recurring charges and a profitability dashboard.

"RIP Alive" Mobile App | ADINI — **Jun 2024 – Dec 2024**

iOS and Android app with vital data in a QR code for emergencies and a legacy for beneficiaries. I built the app, the backend and the admin panel, with subscriptions, payments and a store.
